

# New Patient Billing Information

**This facility is a department of Olathe Medical Center.**

## INITIAL NEW PATIENT EVALUATION APPOINTMENT

You have been scheduled for a Vein Care Center (VCC) new patient evaluation. This appointment will include a history and physical by the nurse and physician, a comprehensive ultrasound of both legs which is used to diagnose venous insufficiency and other abnormalities, and a treatment plan designed especially for you.

**This visit will incur three separate charges that may be billed to insurance:**

1. Olathe Medical Center (Vein Care Center) included on the same bill both the New Patient Evaluation, CPT code 99203 and the Ultrasound Test, CPT code 93970
2. Olathe Health Physicians (Physician Fee) for New Patient Evaluation, CPT code 99202
3. United Imaging (Radiologist Fee) for reading of ultrasound test

## PROCEDURE APPOINTMENT

Your individual treatment plan may include returning for a procedure, such as ablation, sclerotherapy or phlebectomy. The VCC staff will obtain pre-authorization from your insurance provider prior to scheduling the procedures, with the exception of sclerotherapy, which is considered cosmetic. Sclerotherapy is not billable to insurance and must be paid prior to the service. Because of insurance coding requirements, "Outpatient Surgery" may appear on your insurance statement. Vein procedures are in the same category as minor surgery.

**This visit will incur two separate charges that may be billed to insurance:**

1. Olathe Medical Center (Vein Care Center), CPT code based on procedure completed
2. Olathe Health Physicians (Physician Fee), CPT code based on procedure completed

## POST PROCEDURE FOLLOW UP APPOINTMENT

Following your procedure, you will be scheduled for a follow-up or post-procedure visit. It is very important that you keep this appointment. We will be assessing how you are recovering from the procedure, as well as discussing any further care that may be needed. At this visit, a follow-up ultrasound may be completed to assure that no complications have arisen and that you are healing well.

**This visit will incur two to three separate charges that may be billed to insurance:**

1. Olathe Medical Center (Vein Care Center) CPT code based on procedure follow-up and need for follow-up ultrasound
2. Olathe Health Physicians (Physician Fee) may be included in your procedure charge depending on insurance
3. United Imaging (Radiologist Fee) for reading of follow-up ultrasound

**For any insurance/billing questions, please contact your insurance provider first. For additional questions, please call the appropriate billing offices listed below.**
